MATH 111 Section F10N01
Introductory Finite Mathematics I
Sep – Dec 2010

VANCOUVER ISLAND
U N I V E R S I T Y

Time & Location:	Mon & Tue 1:00-2:30 in Bldg 200 Rm 105, Fri 1:30-2:30 in Bldg 380 Rm 201
Instructor:	Glen Pugh glen.pugh@viu.ca (This is <u>by far</u> the best way to reach me!) Bldg 359 Rm 201 (250)753-3245 ext. 2752
Office Hours:	Mon 10:00-11:30, Thu 11:30-1:00 & Fri 10:00-11:30, or by appointment
webpage:	http://web.viu.ca/pughg/Fall2010/math111F10N01 This page will be updated weekly with announcements, handouts, homework assignments and test solutions.
Prerequisite:	Min. "C" in Principles of Math 11 or Applications of Math 11 or a pass in Principles of Math 12 or Applications of Math 12; or equivalent.
Text:	*Finite Mathematics: An Applied Approach (10th Edition)* by Michael Sullivan
Course Outline:	An introduction to basic non-calculus mathematics useful to students in Applied Mathematics, Computing Science, Business and the Social and Biological Sciences. Topics include linear equations, matrices with applications, compound interest and annuities, sets and counting techniques, linear programming and probability. Topics covered and corresponding sections from the text are

- ◆ Linear Equations and Straight Lines: 1.1–1.3
- ◆ Matrices with Applications: 2.1–2.7
- ◆ Linear Programming: The Geometric Approach: 3.1–3.2
- ◆ Mathematics of Finance: 5.1–5.4
- ◆ Sets and Counting Techniques: 6.1–6.6
- ◆ Introduction to Probability: 7.1–7.5 & 8.1

Homework:	Weekly homework assignments from the textbook will be posted on the course website. Doing practice problems is essential for learning mathematics and it is crucial that you complete and understand all assigned homework. In addition to the assigned problems, you should also attempt additional problems from the text to reinforce your understanding. It is important that you are able to solve problems on your own; however, you are also encouraged to work together on the problem sets. Explaining your solutions to others and discussing problem solving strategies contributes enormously to your understanding. You may of course also see me for help with homework problems. Homework will not be collected for grading, though you will be tested on the homework material. Answers to odd-numbered problems are in the back of the text.
Quizzes:	Short in-class quizzes will be given the following **Fridays: Sep 17& 24; Oct 15 & 22; Nov 12 & 19**. Each quiz will have two to four questions and should take about 15 minutes. The purpose of the quizzes is to encourage you to keep up on your homework, and the questions will be very similar to assigned homework questions. Quizzes are worth 15% of your final grade. Your lowest quiz score will be dropped in the calculation of your average, so you may miss one quiz without penalty. No make-up quizzes will be given.

Tests:	There will be three 75 minute class tests given on the following **Mondays: Oct 4**, **Nov 1** and **Nov 29.** Class tests are comprehensive, covering all material since the beginning of the course. Each test is worth 15% of your final grade.
	No make-up tests will be given, but if you miss a class test for a good reason allowances may be made. Documentation <u>must</u> be provided to explain your absence: doctor's note in the case of illness, death certificate in the case of death in the family, police report in the case of car accident, etc. <u>No exceptions</u>.
	If you are ill on test day and you elect to write the test anyway, your grade will stand.
Final Exam:	There will be a comprehensive final exam in December worth 40% of your grade. The exam period is Dec 9-20 2010. Travel plans should not be made until the final exam schedule is released, which is one month before exams begin. **In no event will the final exam be rescheduled to accommodate travel plans.**

Grading Summary:

Quizzes (best 5 of 6):	15%
Class Tests (3):	45%
Final Exam:	40%

Grade Review:	If you do not agree with the grade received on a test, you may submit your paper for regrading within three days of the date it was returned to you. In such cases, the entire paper will be regraded.
	There is no possibility of end-of-term extra credit assignments or supplemental exams to improve final grades.

Grading Scale:

90-100%	A+	76-79%	B+	64-67%	C+	50-54%	D
85-89%	A	72-75%	B	60-63%	C	0-49%	F
80-84%	A-	68-71%	B-	55-59%	C-		

Extra Help:	In addition to help during office hours, you can get extra help from the tutors in the Math Learning Centre located in Bldg 360 Rm 303. A schedule is posted on the door of this room.
Attendance:	Attendance will not be taken, however you are encouraged to attend all lectures. If you miss class, read the textbook sections covered and borrow notes from a classmate. I do not lend my class notes.
Student email:	Ensure that you have an active email address listed in your student record and that you check it regularly. I occasionally email the class with reminders or notices.
Classroom Environment:	I like the classroom environment to be relaxed yet respectful. I encourage you to ask questions, discuss the topics at hand, and quietly listen while your colleagues ask questions or offer comments. Please don't sit and chat if you don't feel like being in class on a particular day. Arrive on time, and if you must leave class early for an appointment, please advise me ahead of time so that disruption is minimized.
Academic Misconduct:	Incidents of cheating or other academic misconduct carry severe consequences and will be dealt with seriously. Refer to VIU Policy 99.01 and Procedure 99.01.001.
Calculators & Translators:	A basic scientific <u>non-programmable</u>, <u>non-graphing</u> calculator may be used for class tests and the final exam. (The Canon F502G, available at Staples for about $10, is plenty). Sharing calculators during quizzes and tests is not permitted.
	Electronic translators may NOT be used for quizzes, tests or the final exam.
Cell Phones & iPods:	Turn off and put away before class. Cell phones may NOT be used as clocks or calculators during tests.
Formula Sheets:	Formula sheets may NOT be used for quizzes, tests or the final exam. You will be required to know some formulas, while other more difficult to remember formulas will be supplied.
