

Final Exam Notes

Your final exam is comprehensive, covering all material since the first day of class. The exam will have about twice as many questions as a term test. 20% or so will cover the Chapter 13 material not yet tested, with the remaining 80% or so distributed equally over Chapters 10, 11 & 12.

I recommend that you review all assigned homework and test practice material, and work through the term tests again (blank copies of the tests are posted on the course website.) Please see the website for suggested review problems for Chapter 13.

Formula Sheet Policy

The standard formula policy applies for the exam: you may use a single letter-size double-sided “cheat-sheet” for the final exam. The cheat-sheet **must be handwritten** and may contain formulae, facts, definitions and theorems, however your cheat sheet **may not contain worked examples**. The instructor will have the final say on what is or is not appropriate for the cheat sheet. You must hand in your cheat sheet along with your completed exam. **To be considered for grading, your exam must include your cheat sheet.**

Calculator Policy

As with tests, you may use a basic scientific non-programmable, non-graphing calculator for the exam.
